

A WORLD LEADER IN FUME
EXTRACTION TECHNOLOGY

AD Base 1 Oracle

Last Updated on 08.04.2021

A 'two in one' solution that runs on any voltage worldwide and doubles up as a work station by placing the laser engraver on top.

The Advantage Base 1 Oracle has been designed so that a number of manufacturers' laser engravers can sit on top of the extractor, effectively doubling it up as a work station. All the Base units in the range have the option of an onboard compressor for a compact installation. BOFA's 'Easi-Seal' filter location makes filter change easy, quick and safe.

The revolutionary Auto-Voltage Sensing Turbine automatically self adjusts to run on any voltage worldwide, while the Reverse Flow filter technology enhances filter performance and ensures longer filter life.

Automatic Flow Control allows the user to preset correct flow rates, giving lower noise levels and further protection of both the combined filter and the patented DeepPleat DUO pre-filter.
